transfer center

# AWS Direct Connect

AWS Direct Connect is a cloud service solution that makes it easy to establish a dedicated network connection from your premises to AWS.

You can create a private connection between AWS and your Data Center, or Office. It will provide you a more consistent network experience than Internet-based connections. Also, you will get more bandwidth throughput at reduced Network costs.

## Benefits of Direct Connect

**Reduces your Bandwidth Costs**

**Elastic and Quickly Scalable**

**Private Connectivity to your Amazon VPC**

**Simple Configuration and Easy to Connect**

**Consistent Network Performance**

**Compatible with all AWS Services**

# AWS Snowball

With Snowball, you don't need to write any code or purchase any hardware to transfer your data. Simply create a job in the AWS Management Console ("Console") and a Snowball device will be automatically shipped to you.

Once it arrives, attach the device to your local network, download and run the Snowball Client ("Client") to establish a connection, and then use the Client to select the file directories that you want to transfer to the device.

The Client will then encrypt and transfer the files to the device at high speed.

## Benefits of Snowball

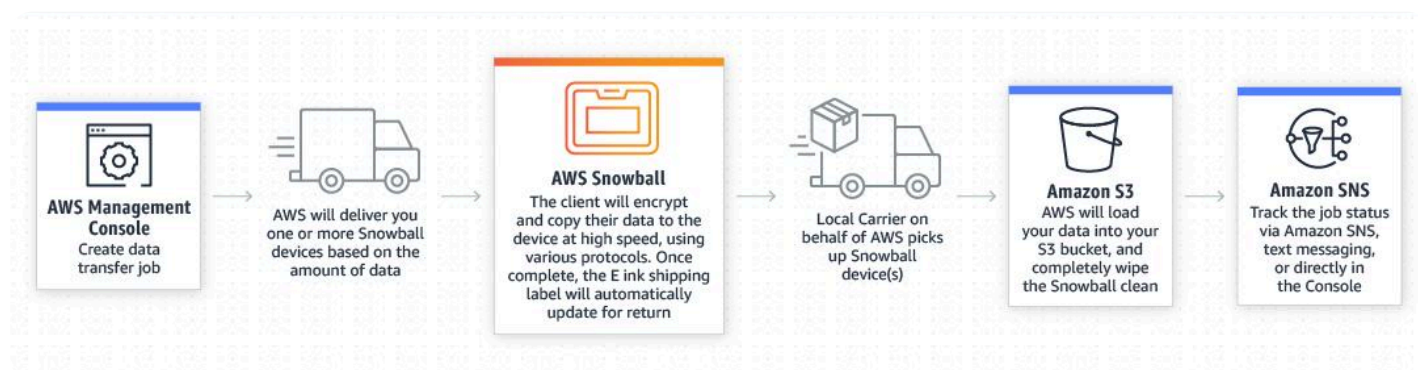

Extremely Scalable  
transport Multiple  
Terabytes of Data

Simple to use and  
compatible with  
Industry-standard  
Network Interfaces

Easy Data Retrieval  
Snowball ensures  
that

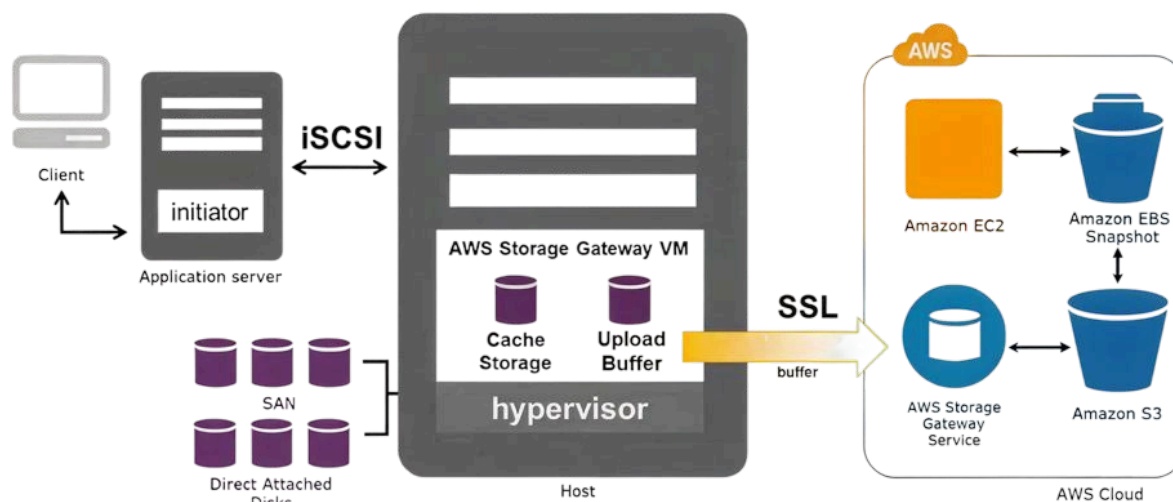

High Data  
Transferring Speed

Tamper-Resistant  
256-bit encryption

# Storage Gateway

## How AWS Storage Gateway Works

AWS Storage Gateway is a hybrid cloud storage service that gives you on-premises access to virtually unlimited cloud storage.

Customers use Storage Gateway to simplify storage management and reduce costs for key hybrid cloud storage use cases.

**To support these use cases, the service provides three different types of gateways**

Tape  
Gateway

File  
Gateway

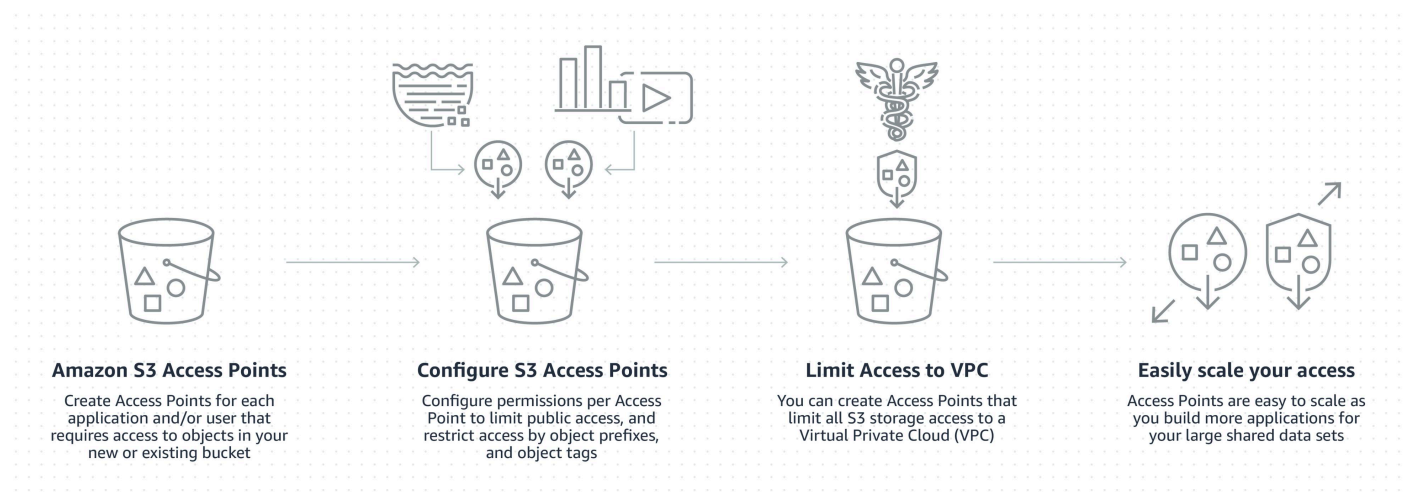

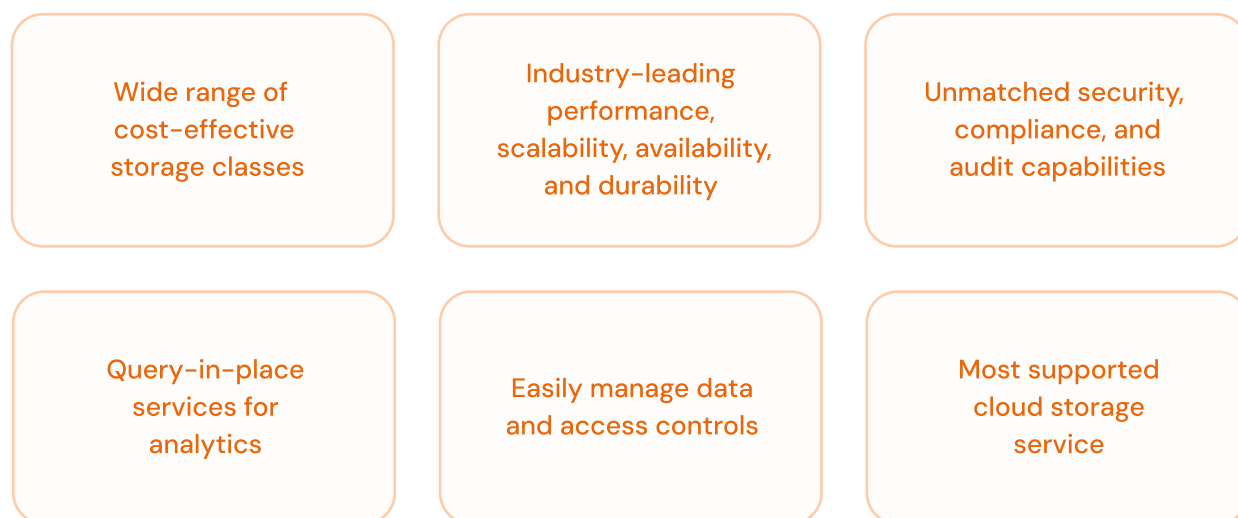

Volume  
Gateway

# Amazon S3

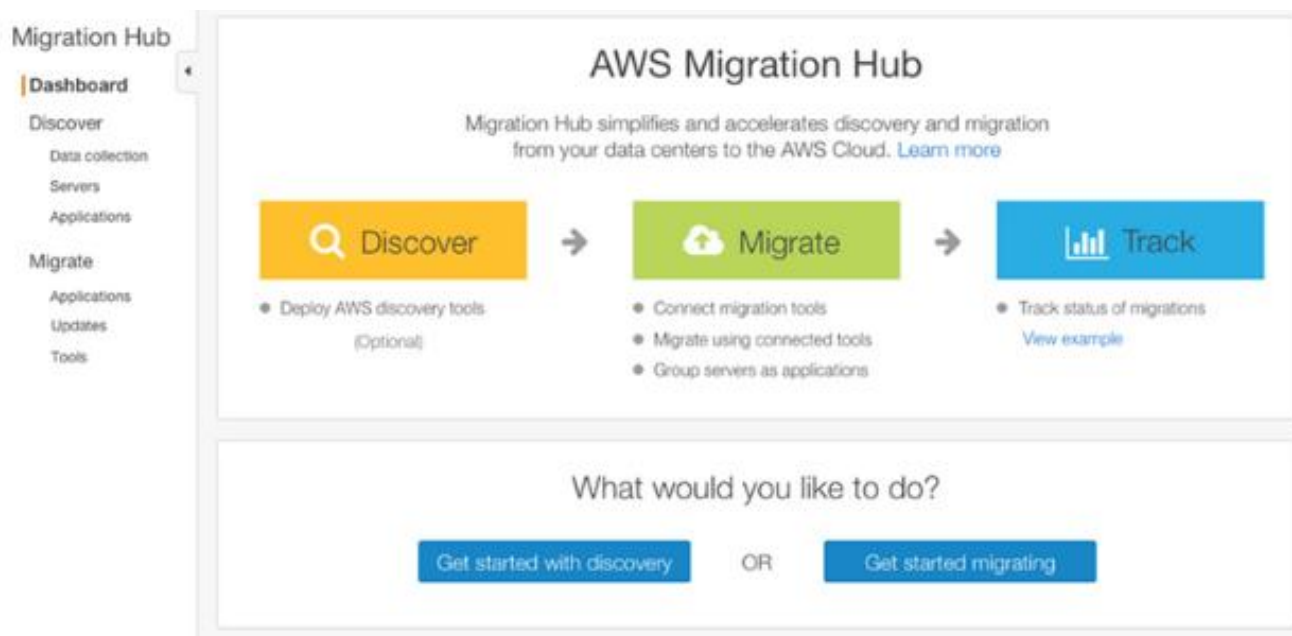

Amazon Simple Storage Service (Amazon S3) is an object storage service that offers industry-leading scalability, data availability, security, and performance.

Amazon S3 provides easy-to-use management features so you can organize your data and configure finely-tuned access controls to meet your specific business, organizational, and compliance requirements.

## Benefits of Amazon S3

# Migration Hub

AWS Migration Hub provides a single location to track the progress of application migrations across multiple AWS and partner solutions.

Migration Hub allows you to choose any of the AWS Migration tools to migrate your data. It also keeps displaying you the status of migration across your portfolio of applications.

Migration Hub also provides key metrics and progress for individual applications, regardless of which tools are being used to migrate them.

## Benefits of Migration Hub

Centralized  
Tracking

Migration  
Flexibility

Improved  
Visibility

# Database Migration Service

AWS Database Migration Service helps you migrate databases to AWS quickly and securely. The source database remains fully operational during the migration, minimizing downtime to applications that rely on the database.

You can migrate your data to and from the most widely used commercial and open-source databases.

## Benefits of Database Migration Service:

Minimal or Virtually no downtime

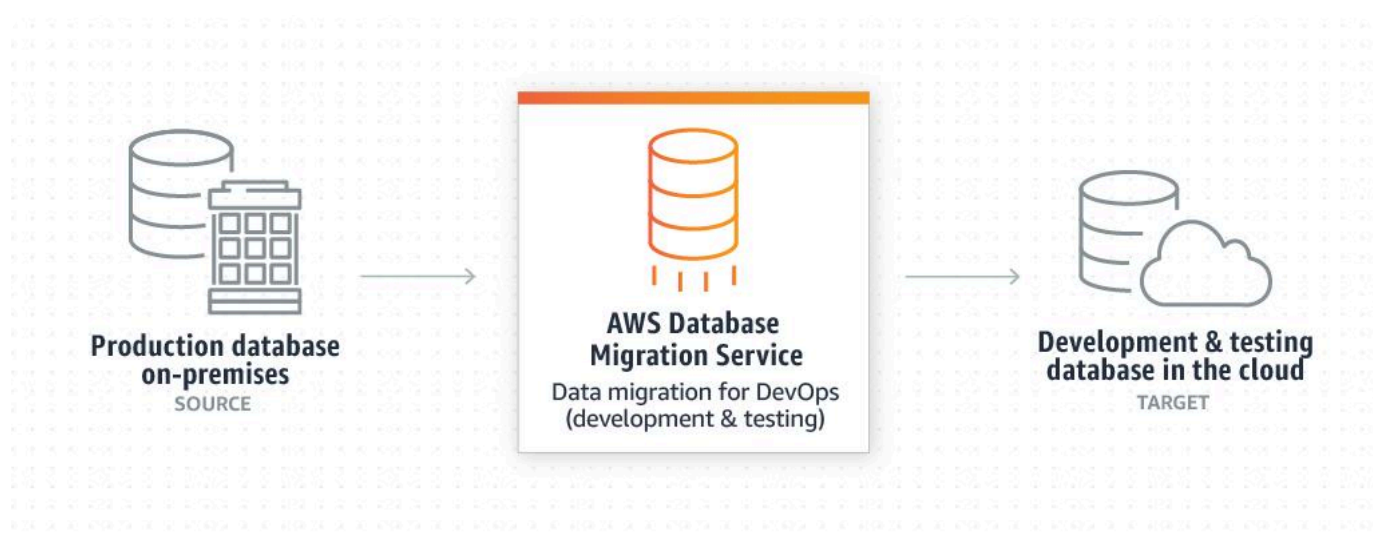

Reliable and Resilient

Supports widely used databases

Begin migration from AWS console

Minimal and lower cost

Fast and Easy to set-up

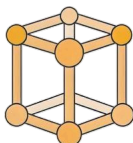

# Application Discovery Service

## AWS Application Discovery Service

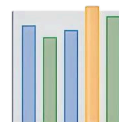

Automate data center application discovery

Identify application  
Inventory

Map application  
dependencies

Baseline system and  
process performance

AWS Application Discovery Service helps enterprise customers plan migration projects by gathering information about their on-premises data centers.

AWS Application Discovery Service collects and presents configuration, usage, and behavior data from your servers to help you better understand your workloads.

## Benefits of Application Discovery Service

Reliable Discovery for  
Migration Planning

Integrated with  
Migration Hub

Protect Data  
with Encryption

Engage with  
Migration Experts

# About Zeno Cloud

Zeno Cloud offers AWS Consulting Service and Cloud Solutions to businesses WorldWide. Our expert team will assess your cloud needs and deliver the solutions that will help your business to achieve its goals. We are certified Amazon partners.
